Shraddha Bhanudas Nemane

nemaneshraddha1994@gmail.com

Objective

To pursue a Master's degree in **Data Analytics / Business Analytics**, leveraging my professional experience in analyzing cloud security, infrastructure, cost, and operational data; preparing dashboards and reports; and supporting risk-based and data-driven decision making.

Professional Interests

Data Analytics • Business Analytics • Risk & Trend Analysis
Dashboards & Reporting • Cloud & Infrastructure Analytics

Education

Bachelor of Engineering – Electronics & Telecommunication
Sant Gadge Baba Amravati University, India | 2016 | First Class| 7.35 CGPA

Diploma – Electronics & Telecommunication
P. R. Pote Polytechnic, Amravati | 2013 | Distinction| 76.46%

Professional Experience

Accenture Technology, Pune — Senior Analyst

Apr 2021 – Present

AHHS – Accenture Human Health Services (Cloud Security & Analytics)

- Analyzed vulnerability and security data across multiple cloud environments.
- Prepared daily, weekly, monthly, and annual dashboards and Excel reports covering vulnerabilities, risk levels, and remediation status.
- Used Excel-based data analysis to manage tool inventory, vulnerability tracking, and decision support across environments.
- Performed trend and risk analysis to support remediation prioritization and audit readiness.
- Used basic Python scripting for dashboard preparation and data visualization.
- Automated security data collection and integration using Ansible.
- Monitored and analyzed cloud security events and access data using cloud-native tools.
- Supported cloud security cost analysis using billing and resource utilization data.
- Prepared technical documentation and analytical summaries for audits and stakeholders.

IPSP – Intelligent Human Health Services (DevOps & Infrastructure Analytics)

- Analyzed deployment and infrastructure metrics across dev, test, and production environments.
- Implemented and worked with AWS Glue, OpenSearch, and MWAA for data processing, log analysis, and workflow orchestration.
- Evaluated AWS usage data and supported cost optimization decisions.
- Provisioned and maintained AWS infrastructure using CloudFormation.
- Used Bitbucket for version control and change tracking.
- Supported CI/CD analytics using Jenkins and SonarQube data.

Bank of Maharashtra Data Center, Pune — Infrastructure Engineer *Dec 2017 – Jun 2020*

- Analyzed infrastructure performance, availability, and operational data in a 24×7 environment.
- Used **basic SQL querying** for operational reporting and system data validation.
- Maintained **Excel-based tracking** for incidents, changes, asset inventory, and backups.
- Administered ITIL-aligned service management workflows and accessed data.
- Designed AWS network architecture and monitored cloud resource utilization.

Selected Projects (Applied & Professional Analytics Projects)

Cloud Vulnerability Trend & Risk Analysis Dashboard

- Analyzed vulnerability data across multiple cloud environments.
- Categorized findings by severity, environment, and remediation status.
- Built **Excel and Python-based dashboards** to track trends and risk reduction over time.
- Used insights to support remediation prioritization and audit discussions.

Cloud Cost & Resource Utilization Analysis (AWS)

- Analyzed AWS usage and billing data across compute, storage, and security services.
- Identified underutilized resources and cost optimization opportunities.
- Linked technical usage metrics with **business cost impact**.

Operational & Compliance Reporting Automation

- Consolidated vulnerability, access, and inventory data into structured Excel reports.
- Defined KPIs such as vulnerability closure rate and SLA adherence.
- Supported internal and external audits through consistent data reporting.

Technical Skills

Data Handling & Analytics:
Excel (dashboards, reporting, decision support), trend analysis, risk metrics, basic SQL, Python (basic scripting, visualization)

Cloud & Data Platforms:
AWS (EC2, S3, RDS, VPC, IAM, CloudWatch, CloudTrail, VPN, CloudFormation), Glue, OpenSearch, MWAA

Security & Monitoring Tools:
Qualys, Splunk, Prisma, Microsoft Defender, Duo Proxy, OUD, Cisco VPN

DevOps & Automation:
Jenkins, Ansible, Bitbucket, Git, SonarQube

Certifications

Microsoft Certified: AZ-900: Microsoft Azure Fundamentals, SC-900: Microsoft Security, Compliance, and Identity Fundamentals.

Google Cloud Certified: Associate Data Practitioner, Cloud Digital Leader, Generative AI Leader, Associate Cloud Engineer

NASCOM Certification: C and C++

Hobbies

Music, Photography, Planting, Travelling, Workout / Yoga
